Placed before the Council for reporting purpose.

Prof. Dr. Satyajit Chakrabarti addressed the fact of multiple supplementaries for each student to which Prof. Dr. Basudev Burman discussed about the awareness of individual responsibilities of the students and guardians. In this context, Prof. Dr. Bhaskar Gupta informed that the failure of the students to qualify in an examination might be due to the fact of the improper knowledge in prerequisites which has to be satisfied before studying a new subject. Prof. Dr. S.M. Chatterjee suggested incorporating the value added induction program to which Prof. Dr. Biswajoy Chatterjee confirmed that the system is already prevalent in the university. The Council members approved the agenda.

Agenda Item No-6

To propose and seek approval for conduct of special supplementary exam keeping in view the benefit of the University.

The semester exam of the University of Engineering & Management, Jaipur is conducted in a way to ensure full benefit of the University, its students and academics. The question papers are set 100% externally. Head Invigilators during exams and Head Examiner for checking answer scripts are all external. Also the NPTEL exam has been made compulsory for all students which forms a major part of students' grade points. The papers, syllabus and course materials of NPTEL are quite above average. But this has resulted in a huge lot of supplementaries and year lags over past 3 to 4 years, which may be harmful for the academic ambience of the University. As students having supplementaries need to clear those supplementary exams along with the regular exams, which leads to many papers to be cleared at the same time, it may be quite difficult for an average brain. To improve the ambience of the University and to give quite a number of students having year lags, a chance to improve their academics, it is proposed that a very special supplementary exam be conducted between 27th to 31st August, 2018, for all papers and for all students having supplementaries specifically. The exam may be conducted as a very special case having maximum external involvement in all stages. Also a very special resolution be proposed from Academic Council to the Board of Management for being carried out stating that this exam is a very special one and is not to be cited for any future case and not to be used as a precedence. Also the resolution if made by the Board, is to be read out in front of all students stating clearly about it being done as a very special case. This will definitely improve the academic ambience of the University and the sincerity of the students towards passing each and every exam (as it is expected that, it will reduce the number of supplementaries and will turn supplementaries to be very special, as against the existing scenario where having 1 supplementary is very normal now even for the above average students). Also it will motivate the students and give them an opportunity to study hard specifically for the exams in which they got the supplementary. After all the objective of the University is to make each and every student learn the papers, and not to give them supplementaries/year lags. However, the examination rule stating the students will have year lag on having 4 supplementaries will continue henceforth.

Accumulation of supplementary exam is one of the major issues faced by many students which forbid the students to know the subjects. The Council member appreciated and granted the agenda for the betterment of the student. Prof. Basudeb Burman suggested that the internal and external examiners should be engaged for preparation for the two sets of question papers per subject. Moderation of the question paper and paper checking should be done by internal examiner. Based on suggestion of Prof. Basudeb Burman , the agenda note can be modified by omitting the statement "Also a very special resolution be proposed from Academic Council to the Board of Management for being carried out stating that this exam is a very special one and is not to be cited for any future case and not to be used as a precedence". Also the agenda can be reframed by mentioning the current academic year. Prof. Dr. S.M. Chatterjee suggested a review can be carried out for the successive years. The Vice Chancellor noted the suggestion.

Agenda Item No-7

To propose and approve of possibility of repeat examinations along with supplementary examinations to achieve increase of grade of students on his/her appeal.

Extending the proposal given in agenda item no. 6 and extending the oral discussion and suggestions held in previous Academic Council meeting, it is proposed that a student may apply for appearing in re-examination of 2 of his/her papers of previous to previous semester, in which he/she did not get supplementary in order to improve his/her grade point. However, these re-examinations will only be conducted along with the supplementary examination of that paper and a student will get only one chance of reappearing and only upto one year of appearing in the regular examination of that paper. However, it is also proposed that the current 3rd year, 4th year and 2018 passout students get a chance to get benefit of this rule (if approved) and get to appear for upto 2 papers per semester till all semesters held for these

students. This chance may be given to them in the next two semesters in order to improve their grade points, learn their papers better and earn good placements. If the proposal is approved by the Council and subsequently by the Board of Management the necessary changes in the exam regulations will be made and will be placed before the Council in the next meeting. Also opinion is being sought from the Academic Council whether to consider only the repeat exam marks or better of the two marks between the repeat and supplementary exam for the final marks of a student after the repeat exam.

The council members approved to take up 2 papers per semester and in any case, the better marks have to be recorded. Prof. Dr. Bhaskar Gupta suggested the improvement examination can be taken through NPTEL examination. Also as per Prof. Dr. Basudeb Burman, the resolution for the examination rules can be reframed for all the years from the current academic year. The Vice Chancellor of the university noted the suggestion.

Agenda Item No-8

To report on new constructions and modifications of existing infrastructure as per requirement of AICTE.

As per requirement of AICTE we needed to extend few class rooms and laboratories to another building to extend the infrastructure. Also ramp had to be constructed and lift had to be installed in academic blocks to ensure barrier free environment. Also all toilets needed to be enabled for physically handicapped. We modified the constructions of few earlier constructed extra hostel blocks to convert those to faculty quarters and we are in the process of shifting the faculty members to these new quarters and convert the old faculty quarter to academic block 2. In the process new classrooms and new laboratories are being set up. Also we have constructed ramps and installed lifts in both academic blocks.

The council members approved the agenda.

Agenda Item No-9

To approve of Convocation function for 2017 passout graduates on 19th August, 2018.

Convocation programme for 2017 passout graduates is proposed on 19th August, 2018 for approval of the Council

The council members were informed about the Convocation function for 2017 passout graduates on 19th August, 2018.

Agenda Item No-10
