Tech Fest- Code Battle

Codesta Coding Club of University of engineering and management, Jaipur in association with IIC and IQAC organized CODE BATTLE in the techfest TECHUTOPIA 2023 on 19.03.23 in the Central lab Cse department for interested students of all years.

Code Battle was an coding contest hosted on Hackerrank platform where 40 participants competed among themselves and learned valuable problem solving skills along with a good brain exercise.

The main motive behind conducting this event was to make the participants apply their logical skills in solving real time problems.

The presence of Prof. Dr Mrinal Kanti Sarkar, HOD CSE department made the event more motivative and successful.

All students enjoyed the competition very much and we hope that they will continue this type of practice of coding and exploring new ideas and solutions every day. Also, we congratulate the winners and thanks the students for their involvement in the competition, thereby making it successful.
